JPetStore

Manual QA Test Cases

Portfolio Test Specification

20 manual test cases | Jira + Xray | Black-box testing

Prepared for portfolio presentation

Project Summary

Total Tests	Passed	Failed	Pass Rate
20	17	3	85%

Scope

The suite covers authentication, registration, checkout validation, session persistence, category/subcategory navigation, main-page navigation, and sign-out behavior.

Test Design Techniques

Decision Table and State Transition testing.

Portfolio Note

This document is a cleaned portfolio presentation of the manual test cases implemented in Jira/Xray. Test IDs and test logic follow the project suite; wording was standardized in English for readability. The original Jira test cases were written in Hebrew.

Final Failed Tests

- 4.4.4.1 - Session is not preserved on return without Sign Out (IP-66).
- 4.5.3.2 - Registered user cannot navigate by subcategory name (IP-67).
- 4.5.4.2 - Unregistered user cannot navigate by subcategory name (IP-67).

Section 4.4 - Authentication, Registration and Purchase

4.4.1.1	Valid username and valid password
Technique	Decision Table
Preconditions	An active registered user account exists.
Test Data	Existing username + the correct password for that account.
Steps	1. Open the Login screen. 2. Enter the valid username. 3. Enter the valid password. 4. Click Login.
Expected Result	Login succeeds and the user is recognized as a registered user.
Final Result	**PASSED**
Related Defect	-

Test case 1 of 20

4.4.1.2	Valid username and invalid password
Technique	Decision Table
Preconditions	An active registered user account exists.
Test Data	Existing username + an incorrect password.
Steps	1. Open the Login screen. 2. Enter the valid username. 3. Enter the invalid password. 4. Click Login.
Expected Result	Login fails and the user is not authenticated as a registered user.
Final Result	**PASSED**
Related Defect	-

Test case 2 of 20

4.4.1.3 Invalid username and valid password

Technique	Decision Table
Preconditions	A registered user exists so a known valid account password is available for the test.
Test Data	Non-existent username + password belonging to an existing account.
Steps	1. Open the Login screen. 2. Enter the invalid username. 3. Enter the valid password. 4. Click Login.
Expected Result	Login fails and the user is not authenticated as a registered user.
Final Result	**PASSED**
Related Defect	-

Test case 3 of 20

4.4.1.4 Invalid username and invalid password

Technique	Decision Table
Preconditions	No special preconditions.
Test Data	Non-existent username + incorrect password.
Steps	1. Open the Login screen. 2. Enter the invalid username. 3. Enter the invalid password. 4. Click Login.
Expected Result	Login fails and the user remains logged out.
Final Result	**PASSED**
Related Defect	-

Test case 4 of 20

4.4.2.1 Navigate from Login to Registration

Technique	State Transition
Preconditions	The user is not logged in.
Test Data	No specific test data required.
Steps	1. Open JPetStore. 2. Click Sign In. 3. Verify that the Login screen is displayed. 4. Click Register.
Expected Result	The Login screen is opened after Sign In, and the Registration screen is opened after Register.
Final Result	**PASSED**
Related Defect	-

Test case 5 of 20

4.4.3.1 Purchase with all required user details completed

Technique	Decision Table
Preconditions	A registered user exists and all required profile details are completed.
Test Data	Registered account with all mandatory user details populated.
Steps	1. Sign in with the registered account. 2. Select a product and add it to the cart. 3. Proceed to checkout / purchase.
Expected Result	The user can continue with the purchase process.
Final Result	**PASSED**
Related Defect	-

Test case 6 of 20

4.4.3.2 Purchase blocked when a required user detail is missing

Technique	Decision Table
Preconditions	A registered user exists with at least one required profile detail missing.
Test Data	Registered account with an incomplete required field.
Steps	1. Sign in with the incomplete account. 2. Select a product and add it to the cart. 3. Proceed to checkout / purchase.
Expected Result	The user cannot continue the purchase until the required information is completed.
Final Result	**PASSED**
Related Defect	IP-65 - High severity - Closed after retest

Test case 7 of 20

4.4.4.1 Returning registered user is recognized without another login

Technique	State Transition
Preconditions	A registered user is logged in and has not clicked Sign Out.
Test Data	Same browser/session used for the return visit.
Steps	1. While logged in, leave or close JPetStore without signing out. 2. Return to JPetStore using the same browser/session. 3. Observe the authentication state.
Expected Result	The session persists and the user is automatically recognized as a registered user without an additional login.
Final Result	**FAILED**
Related Defect	IP-66 - Low severity - Open

Test case 8 of 20

Section 4.5 - Category and Navigation Flows

4.5.1.1	Registered user navigates from Category to Subcategory using the link
Technique	State Transition
Preconditions	The user is registered, logged in, and currently on a Category screen.
Test Data	Any valid subcategory link displayed in the selected category.
Steps	1. Verify the Category screen is displayed. 2. Click the subcategory link.
Expected Result	The selected Subcategory screen is displayed and the user remains logged in.
Final Result	**PASSED**
Related Defect	-

Test case 9 of 20

4.5.2.1	Unregistered user navigates from Category to Subcategory using the link
Technique	State Transition
Preconditions	The user is not logged in and is currently on a Category screen.
Test Data	Any valid subcategory link displayed in the selected category.
Steps	1. Verify the Category screen is displayed. 2. Click the subcategory link.
Expected Result	The selected Subcategory screen is displayed and the user remains unregistered.
Final Result	**PASSED**
Related Defect	-

Test case 10 of 20

4.5.3.1	Registered user opens a Subcategory by clicking the product number
Technique	State Transition
Preconditions	The user is registered, logged in, and currently on a Category screen.
Test Data	A valid product number displayed in the selected category.
Steps	1. Locate a displayed product number on the Category screen. 2. Click the product number.
Expected Result	The matching Subcategory content is displayed and the user remains logged in.
Final Result	**PASSED**
Related Defect	-

Test case 11 of 20

4.5.3.2	Registered user opens a Subcategory by clicking the subcategory name
Technique	State Transition
Preconditions	The user is registered, logged in, and currently on a Category screen.
Test Data	Subcategory name example used during defect reproduction: Amazon Parrot.
Steps	1. Locate the displayed subcategory name. 2. Click the subcategory name.
Expected Result	The matching Subcategory content is displayed and the user remains logged in.
Final Result	**FAILED**
Related Defect	IP-67 - Medium severity - Open

Test case 12 of 20

4.5.4.1	Unregistered user opens a Subcategory by clicking the product number
Technique	State Transition
Preconditions	The user is not logged in and is currently on a Category screen.
Test Data	A valid product number displayed in the selected category.
Steps	1. Locate a displayed product number on the Category screen. 2. Click the product number.
Expected Result	The matching Subcategory content is displayed and the user remains unregistered.
Final Result	**PASSED**
Related Defect	-

Test case 13 of 20

4.5.4.2	Unregistered user opens a Subcategory by clicking the subcategory name
Technique	State Transition
Preconditions	The user is not logged in and is currently on a Category screen.
Test Data	Subcategory name example used during defect reproduction: Amazon Parrot.
Steps	1. Locate the displayed subcategory name. 2. Click the subcategory name.
Expected Result	The matching Subcategory content is displayed and the user remains unregistered.
Final Result	**FAILED**
Related Defect	IP-67 - Medium severity - Open

Test case 14 of 20

4.5.5.1	Registered user returns to Main using the right-side link
Technique	State Transition
Preconditions	The user is registered, logged in, and currently on a Category screen.
Test Data	Right-side navigation link to Main.
Steps	1. Verify the Category screen is displayed. 2. Click the right-side link to Main.
Expected Result	The Main screen is displayed and the user remains logged in.
Final Result	**PASSED**
Related Defect	-

Test case 15 of 20

4.5.6.1	Registered user returns to Main using the store logo
Technique	State Transition
Preconditions	The user is registered, logged in, and currently on a Category screen.
Test Data	Store logo displayed on the left side of the page.
Steps	1. Verify the Category screen is displayed. 2. Click the store logo.
Expected Result	The Main screen is displayed and the user remains logged in.
Final Result	**PASSED**
Related Defect	-

Test case 16 of 20

4.5.7.1 Unregistered user returns to Main using the right-side link

Technique	State Transition
Preconditions	The user is not logged in and is currently on a Category screen.
Test Data	Right-side navigation link to Main.
Steps	1. Verify the Category screen is displayed. 2. Click the right-side link to Main.
Expected Result	The Main screen is displayed and the user remains unregistered.
Final Result	**PASSED**
Related Defect	-

Test case 17 of 20

4.5.8.1 Unregistered user returns to Main using the store logo

Technique	State Transition
Preconditions	The user is not logged in and is currently on a Category screen.
Test Data	Store logo displayed on the left side of the page.
Steps	1. Verify the Category screen is displayed. 2. Click the store logo.
Expected Result	The Main screen is displayed and the user remains unregistered.
Final Result	**PASSED**
Related Defect	-

Test case 18 of 20

4.5.9.1	Unregistered user navigates from Category to Registration through Login
Technique	State Transition
Preconditions	The user is not logged in and is currently on a Category screen.
Test Data	No specific test data required.
Steps	1. Click Sign In. 2. Verify the Login screen is displayed. 3. Click Register. 4. Verify the Registration screen is displayed.
Expected Result	The user follows the complete transition Category -> Login -> Registration successfully.
Final Result	**PASSED**
Related Defect	-

Test case 19 of 20

4.5.10.1	Registered user signs out from the Category screen
Technique	State Transition
Preconditions	The user is registered, logged in, and currently on a Category screen.
Test Data	No specific test data required.
Steps	1. Verify the user is logged in on the Category screen. 2. Click Sign Out.
Expected Result	The authenticated session ends and the user is treated as an unregistered user.
Final Result	**PASSED**
